DETAILED ACTION

Claims 1-15 are presently pending in this application.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, 11, drawn to polynucleotides, polypeptides, vectors and host cells.

Group II, claim(s) 10, drawn to an antibody.

Group III, claim(s) 12-13, drawn to a method of determining whether a substance is an activator or an inhibitor.

Group IV, claim(s) 14, drawn to a pharmaceutical composition comprising activator/inhibitor.

Group V, claim(s) 15, drawn to a method of treating macular degeneration.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Pursuant to 37 C.F.R. 1.475(d), the ISA/US considers that where multiple products and processes are claimed, the main invention shall consist of the first invention of the category first mentioned in the claims and the first recited invention of each of the other categories related thereto. Accordingly, the main invention

Art Unit: 1652

(Group I) comprises the first recited product, the polynucleotide encoding the polypeptide with SEQ ID NO:3. Further, pursuant to 37 C.F. R. 1.475(d), the ISA/US considers that any feature which the subsequently recited products and methods share with the main invention does not constitute a special technical feature within the meaning of PCT Rule 13.2 and that each of such products and methods accordingly defines a separate invention. Furthermore, the polynucleotides and polypeptide of the invention are already known in the prior art and thus the invention, when considered as a whole does not contribute over the prior art.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
